JavaScript Array Lab

Explore and understand different array methods using interactive JavaScript functions.

Current Array

10, 25, 40, 55, 70

Push

Pop

Shift

Unshift

Splice

Slice

Map

Filter

Reduce

ForEach

Maximum

Minimum

Reset Array

Operation Results

Push & Pop

Click a button to perform the operation.

Shift & Unshift

Click a button to perform the operation.

Splice

Click Splice to remove an element.

Slice

Click Slice to extract part of the array.

Map

Click Map to square each number.

Filter

Click Filter to find numbers greater than 30.

Reduce

Click Reduce to calculate the sum.

ForEach

Click ForEach to display every element.

Maximum Value

Click Maximum to find the largest value.

Minimum Value

Click Minimum to find the smallest value.

Case Study: Maximum & Minimum

Maximum Value

Maximum value will appear here.

Minimum Value

Minimum value will appear here.

JavaScript Array Lab

Explore and understand different array methods using interactive JavaScript functions.

Current Array

5 , 25 , 55 , 70

Push

Pop

Shift

Unshift

Splice

Slice

Map

Filter

Reduce

ForEach

Maximum

Minimum

Reset Array

Operation Results

Push & Pop

pop() removed 90 from the end.
Updated Array: 10, 25, 40, 55, 70

Shift & Unshift

unshift() added 5 at the beginning.
Updated Array: 5, 25, 40, 55, 70

Splice

splice() removed element 40 from index 2.
Updated Array: 5, 25, 55, 70

Slice

slice(1, 4) returned:
25, 55, 70

Map

map() squares every number:
25, 625, 3025, 4900

Filter

filter() selected numbers greater than 30:
55, 70

Reduce

reduce() calculated the total sum:
155

ForEach

forEach() visited every element:
5 25 55 70

Maximum Value

Maximum value = 70

Minimum Value

Minimum value = 5

Case Study: Maximum & Minimum

Maximum Value

The maximum value in the current array is 70.

Minimum Value

The minimum value in the current array is 5.
